

AHLT 123R : Functional Kinesiology

This course is designed to give the student a basic understanding of normal human body movement as related to skeletal, articular, neurological, and muscular systems. Anatomical palpation and biomechanical principles with a focus on lever systems in the body are also included. This course follows the successful completion of Anatomy & Physiology I. For students in the PTA and OTA programs: this course is a first year, second semester course.

Credits 3

Lab Hours 3

Lecture Hours 2
