

PSYC 200R: Educational Psychology

Educational Psychology is designed to cover five broad topics: development, learning, lesson and classroom management, assessment, and characteristics of learners. The development component focuses on developmental theories of cognition and affect as they relate to education. The learning component presents behavioral and cognitive perspectives on learning, problem solving, critical-thinking, and reasoning. The classroom management component focuses on the evaluation of learner characteristics to include those with exceptionalities and ethnically diverse learners. This course provides basic knowledge from the discipline of psychology as related to the field of education and application of this basic knowledge to improve the quality and outcome of the educational process.

Credits: 3

Lecture Hours: 3

Prerequisites:

PSYC 101R

Program: [Psychology](#)
